Conservation Assessment						
rehousing needed: suggested for conservation for the following reasons (also note type of conservation required):						
☐ STABLE : ☐ Item has only minor flaws, tears or surface dirt						
☐ UNSTABLE: ☐ Adhered to poor quality materials / pressure sensitive tape						
☐ URGENT ☐ Severe condition problems or high priority or significant item						
■ NEEDS ATTENTION ■ Requires repair of tears/loss ■ Requires flattening of folds/creas ■ Requires removal of adhesions/ta ■ Requires reduction of staining/dis ■ Water damaged ■ Requires surface cleaning ■ Candidate for aqueous reduction	ape/adhesives scolouration					
TREATMENT RECOMMENDATIONS Surface clean with vulcanized rubber sponge, soft brush, dust cloth Tear repair with Japanese paper and wheat starch paste Localized flattening Removal of water soluble tape/adhesions Removal of Pressure Sensitive tapes/adhesive						
Drawing of condition:
